JULY 2008 / £4.50

► **D&T Electronics**

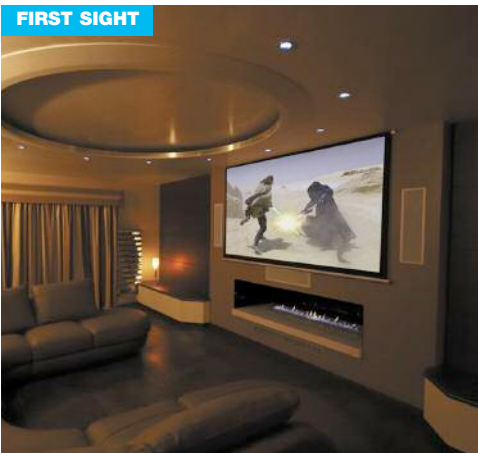

D&T Electronics offers thirty years experience of technologies for the home and office. Custom installed, turnkey solutions provide simple-to-use, comprehensive control of lighting, entertainment, security, communications and HVAC systems. D&T work hard to combine aesthetics with the latest technology to deliver maximum performance and low visual profile. D&T were finalists for no less than five CEDIA 2008 awards - from Best Home Cinema to Best Integrated Home over £100,000. *enq 100*

▼ **Finite Solutions**

Finite Solutions proudly announce a double win at the highly acclaimed CEDIA Home Technology Awards, winning of Best Home Cinema over £20,000 (pictured) and Best UK Integrated Home £100,000 - £250,000, featuring lighting control, home automation and multi-room audio/video. Finite Solutions offer a RIBA accredited CPD programme entitled, 'Designing Integrated Future Ready Homes'. Add award winning home technology to your schemes. *enq 101*

FIRST SIGHT

▼ **Imerge**

Imerge is a premier manufacturer and developer of hard drive based entertainment servers. Imerge make it simple for users to store their content and replay it, anytime they want it, with maximum fidelity and minimum fuss. Imerge's SoundServer is a leading provider of audio server systems, and the technology within it a recognised standard. The new MS5000 MediaServer offers the same wonderful experience that the SoundServers bring, but also for movies. *enq 103*

◄ **Martin Kleiser**

CEDIA Finalist (Best Integrated Home over £250,000) Martin Kleiser continue to provide highly bespoke home automation solutions that transform the living environment into a utopia at the touch of a button. The nominated project - implementing audio-visual distribution, intercom and paging, CCTV distribution and heating control - provided the audio performance and flexibility desired along with the control and monitoring of the house that was integral to the design. *enq 102*

► **Lutron**

Renowned for offering flexible solutions for high profile installations, Lutron Electronics Co. Inc. displayed its full range of artificial lighting control expertise at CEDIA expo this year. New additions include GRAFIK Eye® QS lighting control technology, HomeWorks® system, seeTouch® International HomeWorks keypads, Rania® RF HomeWorks range, sophisticated Sivoia® QED blinds, Sivoia® QS technology dimming range and the new Lyneo® 0-10 dimmer. *enq 104*

▲ Almerich

Designed by Luis Eslava for Spanish manufacturer Almerich, the Boomerang lamp is inspired by the sequence of images of a boomerang in movement. It reflects this dynamism through a repetition of triangular sections piled together. Made of powder-coated metal sheets, with top and base in coloured glass, it measures 40cm x 30cm x 40cm. The lamp was launched at the Light & Building Fair in Frankfurt. *enq 105*

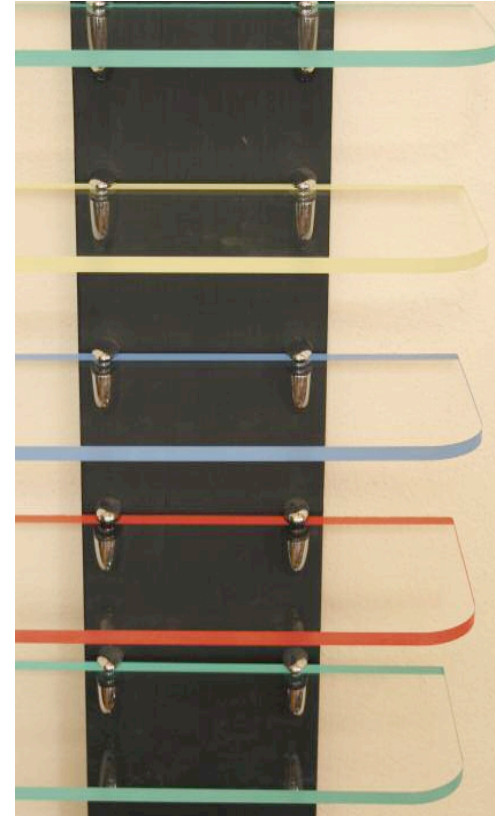

FIRST SIGHT

▲ Estiluz

Designed Estiluz, Elia is a collection of lamps with an elegant circular form. A wide, flat metal ring - finished in nickel, black or white - encircles two pieces of white, satin-finished glass, allowing a very soft light to filter from the bulb. The metal ring is broken by a white slot around the circumference, allowing the light to escape and giving it its distinctive signature. The range includes ceiling, wall, suspension, table and floor lamps. *enq 107*

▼ Earlsmann Lighting

For those areas in which you would like a hint of colour without the need for trailing wires, Earlsmann have the solution. ColourEdge shelving will match your existing colour scheme or can offer complementary shades or bright highlights. Suitable for all applications, ColourEdge is available in acrylic or low iron glass and a variety of sizes. A Colour matching service is also available to suit any décor allowing for a complimentary finish every time. *enq 106*

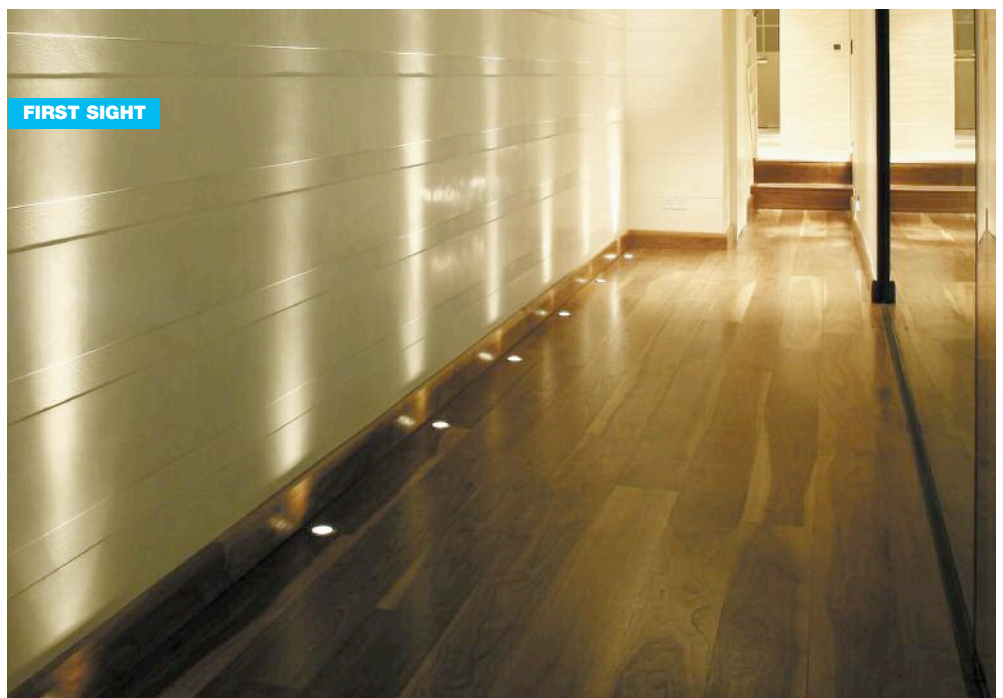

▲ Hacel Lighting

Linear Light4 from Hacel is a clean and contemporary horizontal lighting system due for release this summer. The system comprises an extensive range of die cast and extruded aluminium modules available in either Suspended or Surface, Link or Solo versions. A comprehensive choice of T5 fluorescent modules are available, whilst a variety of accessories such as Spacer Modules and Connectors add versatility to the system and a seven wire harness provides electrical flexibility. *enq 108*

▶ John Cullen Lighting

New to John Cullen's LED range, Lucca, is both an up and step light. Cool to the touch and IP65 rated, Lucca can also be used outside and in bathrooms. With a 1.2w warm white LED, emitting a similar light to tungsten, it has a bezel of only 52mm and a recess depth of 55mm. It is ideal for up-lighting columns, bookcases, arches, fireplaces, window reveals or walls and is available in four finishes. *enq 109*
